

Bobcat®

Mini Track Loaders

MT55 & MT85

One Tough Animal™

The small-scale loader for **HIGH-SCALE PRODUCTION**

It's not much wider than your average wheelbarrow, but don't let its small size give you the wrong idea. Bobcat® mini track loaders can do serious work. Use them for digging, tilling, trenching, moving material and more.

They're tough, versatile, fast, agile and strong, delivering the rugged dependability and premium performance that you expect from the Bobcat brand. Simple controls make it a perfect fit for less-experienced employees and seasonal help. A smaller profile gives you more power and versatility in tight spaces.

For landscapers, contractors, rental operators and more, the Bobcat mini track loader is the perfect complement for your equipment fleet.

GET INTO THE TIGHTEST AREAS

Your Bobcat mini track loader packs a lot of power in a small package. They're the perfect solution for tight-fitting indoor and outdoor jobs where wheelbarrows and shovels are the only other option.

EASY TO USE

One-hand drive operation makes the Bobcat mini track loader the easiest-to-operate model on the market. Its ease-of-use and less-intimidating size make a great match for less-experienced equipment operators, renters and seasonal help – or for anyone who needs to do big jobs in small areas.

The NEW Bobcat MT85

Built on the job-proven design of the MT55, the Bobcat MT85 has an increased, 850-lb. operating capacity and greater lift height to handle heavy lifting and material handling. With eight inches of ground clearance and its hard-pushing, high-flotation tracks, this machine provides an endless list of possibilities for professional-level work in challenging terrain. A standard ride-on platform provides comfort and convenience for the job.

MORE PERFORMANCE

The MT85 offers 14 percent more lift height and 54 percent more rated operating capacity than the MT55. A 23 percent increase in forward travel speed gives you a huge increase in overall productivity.

MORE VISIBILITY AND COMFORT

The integrated MT85 ride-on platform gives you more visibility to your bucket cutting edges or attachment – and improved side visibility as well.

NEW JOYSTICK CONTROLS

The new mechanical joysticks on the MT85 provide superb operator comfort and fine tune precision.

HIGH-PERFORMANCE TRACK TECHNOLOGY

An additional roller provides a longer track footprint on the MT85. You get more stability and a lower ground pressure as a result. Its industry-proven spring tensioning system is effective, durable and easy to adjust.

MT85	850 lb.	80.9 in.	25 hp	36 in.	12 gpm
	Rated Operating Capacity	Lift Height	Liquid-Cooled Diesel Engine	Width (with bucket)	Auxiliary Hydraulic Flow

CHOOSE YOUR TRACKS.

Bobcat mini track loaders offer two different track sizes (35.6 inches and 41.1 inches) that provide your preferred combination of performance and comfort characteristics.

NARROW TRACK: UNDER 36-INCHES WIDE

Narrow tracks keep your width to just 35.6 inches. Depending on the size of your attachment, you can easily slip through just about any doorway or fence gate with the narrow-track option. A ground pressure of 4.9 psi protects turf and finished surfaces.

WIDE TRACK: MINIMIZED GROUND PRESSURE, INCREASED STABILITY

The optional wide track improves stability and ride quality while reducing ground pressure to just 3.5 psi – the lightest-possible footprint for sensitive surfaces – and it's still just 41.1 inches wide.

The Bobcat MT55

This hard-working, 550-lb. capacity machine can take incredible power to your toughest jobs in close quarters. Its drive/steering control makes for easy and intuitive operation. It turns quickly in its tracks, treads lightly with minimal disturbance and provides endless work-saving opportunities using many Bobcat attachments.

RIDE ON OR WALK BEHIND

An optional pin-on riding platform can be easily added and removed to increase operator performance.

ONE-HAND DRIVE OPERATION

Operate with confidence using the convenient multi-functional control lever on the MT55. It allows you to control drive speed and steering with one hand.

MINIMAL GROUND DISTURBANCE

The durable rubber tracks allow you to travel over established surfaces without worrying about damages, repair time and costs later.

Built for your preferred ATTACHMENT STYLE

Available with your choice of two attachment-mounting systems, Bobcat provides the best attachment versatility in the industry.

BOB-TACH ATTACHMENT MOUNTING SYSTEM

The Bob-Tach™ system provides a comprehensive selection of Bobcat-built attachments for mini track loaders. Its two robust, over-center latching pins provide the fastest attachment changes in the industry – and spring-loaded, wear-compensating wedges ensure a secure fit, time after time and year after year.

Attachments for Bob-Tach Attachment Mounting System:

- Angle Broom
- Attachment Adapter Plate
- Auger
- Backhoe (MT55 Only)
- Boring Unit
- 36-inch Bucket
- 44-inch Bucket
- Digger
- Hydraulic Breaker
- Industrial Grapple
- Landplane
- Pallet Fork
- Root Grapple
- Snowblower
- Soil Conditioner
- Stump Grinder
- Sweeper
- Tiller
- Tree Fork
- Trencher
- Utility Blade
- Utility Fork
- Utility Grapple
- Vibratory Plow

COMMON INDUSTRY INTERFACE (CII)

Choose the CII system for a smaller, pin-on attachment style that's common on mini track loaders, but it provides the same range of motion and usability as our industry-leading Bob-Tach system. The Bobcat CII system features exclusive dual over-center, 90-degree latches that make for secure and quick attachment hookup. The pin is greasable and serviceable to facilitate long product life and ease-of-use.

Attachments for the Common Industry Interface:

- Model 10 Auger CII
- 36-inch GP Bucket CII
- 44-inch GP Bucket CII
- Breaker CII Frame
- Pallet Fork CII
- Trencher CII LT 113

Concentrated Power

With rated operating capacities of 850 and 550 pounds, Bobcat MT85 or MT55 mini track loaders are the perfect complement to your fleet. Both models go where other machines can't; they're just 35.6 inches wide and under 85 inches long without an attachment. Squeeze through doorways and fence gates and work in close quarters indoors or outdoors. Rugged rubber tracks keep you going in soft, wet or muddy conditions, with minimal ground disturbance.

Get versatile! Hook up to a wide choice of hard-working Bobcat attachments, including:

Angle Broom

Sweeps snow, dirt and debris from sidewalks, driveways and warehouse floors.

Auger

Augers holes with speed and plumb-line accuracy. Bits up to 36-in. available.

Backhoe – MT55 Only

Excavates in hard-to-reach areas. Ideal for landscaping, nurseries, water and power lines.

Boring Unit

Installs utilities under driveways, sidewalks and other obstructions with minimal ground disturbance.

Bucket

Numerous styles and sizes. Designed to handle a wide variety of jobs and materials.

Digger

Removes rocks and stumps, digs trenches, transplants trees. Can be used for anything where a spade is used.

Hydraulic Breaker

Breaks up asphalt, concrete and rocks; smashes through walls. Exceptional power.

Grapple (Industrial, Root, Utility)

Three different grapple styles: Industrial bucket grapple for demolition and removal, root grapple for sorting debris while leaving dirt behind, utility fork and grapple or bucket and grapple for light clean-up duties.

Landplane

Grades, levels, transports material, breaks up hard ground and peels sod.

Pallet Fork

Handles palletized material and long objects, such as lumber and fence posts.

Snowblower

Throws snow to clear a clean path. Rotating chute and adjustable deflector directs snow where the operator wants it placed.

Soil Conditioner

Smooths ruts, moves material, levels mounds and prepares soil for seed or sod.

Stump Grinder

Gets into tight areas and quickly grinds tree stumps into mulch.

Tiller

Digs and loosens soil, mixes compost and other materials into existing soil.

Tree Fork

With one stationary and one moveable arm, grabs, lifts and transports trees, rocks and other oddly-shaped materials.

Trencher

Handles a wide range of jobs, including trenching close to buildings. Depths down to three feet.

Utility Blade

Operates as a snow blade or dozer blade. Moldboard angles up to 30 degrees.

Vibratory Plow

Installs flexible pipe and utility cable 6-8 inches in the ground with minimal ground disturbance.
